The programme of the convention today included first a discussion of practical banking questions by the convention. The discussion was limited to thirty minutes and speeches to five minutes. Professor Joseph French Johnson, dean of the New York University School of Commerce, Accounts and Finance, told the convention of the advantages of commercial

education.

An interesting history of the Scotch systems of banking was presented to the convention by Robert Blythe, gen-eral manager of the Union Bank of Scotland, located at Glasgow. The first Scotch bank was established in 1695. Today, there are but ten banks in Scotland, seven doing nine-tenths of the business. The chief characteristic of the Scotch system is the right of the banks to issue the one-pound note, as the result of which Scotland retains today her paper currency, al-most to the exclusion of metal cur-rency, while the reverse is true in

England.

Blythe maintained that it was the one-pound note that enabled the network of branch banks to be maintained in Scotland and that encouraged the savings of the poorer classes. With the English five-pound notes and

[BT THE ASSOCIATED PRESS-P.M.] ACRAMENTO, Oct. 12.-Crying Sout in the futile protest against an inexorable decree of justice, hysterical with the shock of her sudtrated by the shock, Mrs. E. J. Emmons flung herself upon her knees in Judge Hart's courtroom this evening at the instant a verdict of guilty was returned by the jury which has been for five weeks engaged in trial of her

husband on a charge of boodling.

All the eagerness and suppressed excitement that attended the consummation of the long trial was forgotten in the sudden realization of a wife's grief; all the stern formality of the courtroom was swept away in a waive of pity that surged from every heart, and when Emmons, seemingly unmindful of the decree just rendered against him, aprang to his wife's assistance, every head was turned away; the voice of Judge Hart faltered, and the property of the stepped.

The short period engaged in de-liberation conveyed to many of those in attendance a belief that the jury would return a verdict of guilty, but Emmons, his wife and his attorneys were to all outward appearances as confident as at any time during the trial. Had there been any intimation given of the result, it is probable that the friends of Mrs. Emmons would have prevailed upon her to remain away from the courtroom during the last trying

KALAMAZOO (Mich.) Oct. 12.—[Exclusive Dispatch.] Prof. W. N. Ferris, president of the Ferris Anstitute of Big Rapids, Mich., and Democratic candidate for Lieutenant-Governor of Michigan, delivered a sensational ad-dress before the Michigan State Conference of the Unitarian Independent and other Liberal churches here today. "I hate charity," he said. "While it is all right in individual cases, it is all wrong as a system. The rich don't want charity, the poor don't want it; paupers alone want charity. All men want human justice and the short road to it. I do not believe in the present system of schools. The teachers of domestic economy belons to the domestic economy belong to the home. So much of the home has been taken into the schools that the next thing we know incubators will be placed there and the clubwomen will have their new-born babies taken there to be reared."

ITS WITHDRAWAL CAUSES SEN-SATION IN LONDON.

eman Who Took Bribe from Member of Perliament Implicated In Wife Murder, to Clear Latter by Dictated Testimony, Goes Back on His Sworn Word.

[BY TRE ASSOCIATED PRESS—A.M.]

LONDON, Oct 12.—[By Atlantic Cable.] Today's proceedings in the case of Hugh Wast, the former member of Parliament, who is charged with attempting to bribe a private detective named Marshall to assist him in murdering Watt's wife, were marked by the sensational withdrawal by the calluman, Norman Battle, of the testimony which he gave September 22.

On that occasion, Battle declared that he overheard a conversation between Marshall was threatened. Battle today said his real name was Lightfoot, and that Watts, who was accompanied by a man describing himself as an equerry of King Edward, met the witness in Hyde Park, Angust 24, and informed him that the King wished the case to be withdrawa.

At Watt's dictation, Battle (or Lightfoot) wrote a letter to Watt's lawyers, saying he could clear Wast. The latter taked dictated the testimony which the witness gave September 22. Battle added that he had received about 3200 from Watt, and the equerry was advised to go to Canada, and was promised \$15,000 and a government position for life.

Replying to further questions, Battle said the supposed equerry was introduced as "Lord Kindoch." The latter battle and the supposed equerry was introduced as "Lord Kindoch." KANSAS CITY WOMAN'S PATE.
BY THE ASSOCIATED PRESS-A.M.
KANSAS CITY, Oct. 12.—A clew in KANSAS CITY, Oct. 12.—A clew in the mysterious murder case of Mrs. Ella Christina Henson, whose body was found in the weeds in the southern part of the city Sunday fast, was discovered today in the finding of the woman's trunk at a boarding-house in the downtown district. The woman had been murdered on Friday night last, soon after she had married Charles Henson, who has since disappeared. The woman's trunk found today bore evidence of having been robbed. It had been taken to the boarding-house Thursday last, the day before the murder, by two men, one of whom had engaged a room for a week. Both of the men disappeared on the following day and no trace of them has been found.

HOLD-UP MAN, THIST

nuel Leiva was arrested yesterday

srday mornig.

Rivas appeared at Police Headquar-ers yesterday afternon and identified adva as his assailant from among a number of prisoners herded in the "bull

pen."
While walking toward his lodging at Mo. 707 Buene Vista street, Rivas was accosted, and a demand made for his money. He refused and was knocked insensible and robbed of 315 in cash, when found by Patroiman Leon, Rivas was taken to the Receiving Hospital and his injuries dressed.
The police believe Leiva is implicated in numerous hold-ups which have occurred recently. He was arrested and sentenced to six months' imprisonment in the County Jail in 1901 for assault with a deadly weapon.

"BRUSHES" ELUDE POLICE.

[HY THE ASSOCIATED PRESS-P.M.] PRKELEY, Oct. 12.—The efforts of police of this city, Oakland, San unciece and interior towns to find Trancisco and interior towns to find trace of William Curjis, alias Brush, and his wife, who yesterday robbed William C. Ellis, the Australian horseman, after they had almost murdered him, have proven fruitless. They are suspected of being connected with the gang of outlaws, one of whom recently was shot dead by Policeman Lestrange, whom they attempted to rob, but no definite clew to their identity has yet been obtained.

The pair are known to have taken an electric car from Barkeley into Oakland, and were seen on the car by Berkeley woman, Mrs. H. F. Moulton, three blocks from the ionely house in which the crime was committed. Mrs. Boulton identified the couple, her description tailying with that given by Ellis. She says the man and woman, who were greatly excited and carried a grip, boarded the car on which she

was riding, but got off a few blocks from the starting point and hurried off on foot toward Ozkland.

Ellis's condition is still critical, the physicians having operated on him during the night for his fractured skull, but it is believed he will survive. He corrects the story he first told, when in a dazed condition, modifying the amount of money secured by the would-be murderers, but corroborated the police theory that a ghastly murder had been deliberately planned by Brush and his young female companion.

Brush and his young female companion.

Eilis said that, after being struck on the head by a big hammer, his clothes were rified and his assailants escaped, leaving him for dead. Eilis said today that he was the first to get out of the house, escaping after a terrific struggle with the man and woman, who could not pursue him out of the house, as the neighborhood is thickly settled. When the victim thus eluded them, the pair went away.

Eilis first stated, while incoherent, that \$5000 was secured by the assailant from his clothes. He now states that he had but \$1000 on his person, of which the thieves got \$500, the remainder being found in his clothes by the police.

Eilis has provided the detectives with

New York Lawyer Prefers Suicide to Facing Trial on Charge of Loot-ing Estate Left in His Care—Was Active in Politics and Had Support

(BY THE ASSOCIATED PRESS-A.M.) NEW YORK, Oct. 12.—Rather than race trial on the indictment charging him with fraudulently taking money from the Weissel estate, Armitage Mathews, lawyer and secretary of the County Republican Committee, today committed suicide by jumping from a window in his apartments to a stone pavement in the courtyard. He struck on his head, fracturing his skull, and died in a short time.

died in a short time.

Mathews, who was a young man, had advanced rapidly, both in the practice of his profession and in politics. He was a friend of Former Gov. Black and of Abraham Gruber and Black and of Abraham Gruber and they were loyal to him in his-trouble, acting as legal advisers and doing all they could to aid him to obtain the change of venue from this county for which he applied. The change of venue was denied yesterslay and trial of the case was set for today before Justice Davy, in the criminal branch of the Supreme Court.

of the case was set for today before Justice Davy, in the criminal branch of the Supreme Court.

Barly this morning, Mathews received a special delivery letter. After reading it, his housekeeper heard him go to another room and open a window. A few seconds later, he jumped to his death.

Mathews was indicted last May on charges of conspiracy and grand larceny growing out of the looting of the Weissel state, of which David Rothschild, wrecker of the Federal Bank, was administrator, Rothschild. John W. Wooten and Lawyer Samuel Ferguson were all indicted a the Mathews on the same charge. Rothschild is now serving a long term in the State prison for wrecking the Federal Bank, and Wooten was convicted in June and sentenced to nine years and five months in Sing Sing.

Mathews was the local representative of the Bankers' Surety Company of Cleveland, which was on Rothschild's bond for \$400,000 as administrator of the Weissel statate. It was agreed by the four accused men, according to the indictment, that Rothschild was to have sole possession of the estate and that whatever money he borrowed on it was to be shared by his associates.

Mathews at one time was an assistant district attorney. He served there texms as a member of the Board of Aldeemen. Two years ago, he was made secretary of the County Republican Committee.

NEW YORK YIELDS UP HIDEOUS MURDER

NEW YORK, Oct. 12.—The finding of a man's head in East Eighteenth street, near Avenue C, early today, resulted in the discovery of an unusually revolting murder, the victim of which was Thomas Corcoran, Corcoran was killed, probably, last night in the house, No. 149 Third avenue.

After the picking up of the head, the other portions of the body were found, cut to pieces, in the Third-avenue house. The arms below the el-bow and the legs below the knees had been packed in a suit case, and the torso and remaining portions of the arms and legs were hidden in a clothes hamper in a room occupied by Frederick Bauer, an elevator runner. Bauer was an elevator runner. Bauer was arrested.

The point at which the head was found is more than a quarter of a mile away from 149 Third avenue. The head was wrapped in the Sunday supplement of a German newspaper and a biue and white shirt.

The murder was discovered through a story told by George Lanole, who had a room adjoining Bauer's, and who rushed into a police station today, saying that he had lain awake for hours listening to noises which he thought proceeded from Bauer's room. He said that lat last night he heard at least two men quarreling in the adjoining room. He heard a shot and the sound of someone falling on the floor. Then he went to sleep.

About 2:20 this morning, Lanole said, he was awakened by strange noises in terms of a rather late hour from an analysing the shore in this city with a married sister. He was a street late hour from an arried sister. He was a wakened by strange noises in the act as the process of the sound of someone falling on the floor. Then he went to sleep.

American Detectives

American Detectives.

A plain, unvarnished statement of the conditions in the police departments of the great majority of American cities would be an astounding revelation of trickery, graft, dishonesty and betrayal of public office. There are probably exceptions to this statement. The chances are that there are honest policemen and genuine detectives, who are true to their trusts, and who perform their duties with fidelity. Judging by the newspapers of this country, however, (a fair criterion in this instance,) the police and detective systems, especially the latter, are rotten to the core. Here on this Coast we do not even raise an eyebrow when the daily press states that such and such a "detective" recovered stolen property, placed it in the hands of the police officials, and when it is wanted by the original owner he is told that the property has "disappared." We also take it as a matter of course for our keen "detectives" to protect the burns. Thieves, and robbers of a community by grafting the public or "standing in" with thieves when stolen property is discovered on the person of the thief. Nor is it as uncommon thing for our "detectives" to allow criminals to escape, provided the hand at the back is palmed with gold. Byzgything, in fact, points to the conclusion that while the so-called "detectives" are in the pay of the city they are in reality "fences." "go-betweens," grafters of the most intolerable, irritating type in league with crime and protectors of it. This Augean stable of rottenness and corruption is fan't becoming unendurable.—William Bittle Wells in Pacific Monthly.

Wild Cat Atracks a Man Wild Cat Afracks a Man.
It is not commonly accepted that the wild cat is so vicebus as to attack human beings, and this section has lately furnished the cut that proves the exception to the rule. Albert Dennis, a guard at the Vara Turpentine Company's convict camp, was, Wednesday night, attacked by a monster cat in Gillette Creek, not more than a mile from the camp, and had he not used unusual presence of vaind, would most likely have been torn in pieces. The young man was returning to his quar-

ters at a rather late hour from an evening pleasantly spent with his parents three miles distant, and upon reaching the swamp of the creek, was literally held at bay by the cat, which held the pass to the bridge beyond, and refused to myove when advanced upon by Mr. Dennis. The young man was armed only with a clasp knife and with his weapon he waded into the brute, kicking him over first. The cat sprang quickly upon him and succeeded in doing the young man's Sunday clothes considerable damage before his throat was cut. Mr. Dennis has killed several cats in his time, but says this one is the biggest he has ever seen. It is said that the female cat is especially vicious during the period of nursing, and the one in question was seen to be carrying young. was seen to be carrying yo Tampa (Fla.) Tribune.

A Lie or a Prevarigation? A. McCall of the New York Life In-

A. McCall of the New York Life Insurance Company, asking, among other things, for a statement of the amount paid by the company for political purposes "during the past campaign."

President McCall did not answer that letter. But he must have caused an answer to be sent to it, for there is on file at Austin, Tex., a letter dated January 9, signed by George W. Hubbell, general solicitor, enclosing an affidavit signed by Theodore M. Banta, cashier, asserting that all payments except those made at branch offices pass through his department, and that no moneys were paid, directly or indirectly, to the Republican campaign fund "during to recent Presidential election."

fund "during to recent Freshentiselection."

Mr. Banta may not have known that
he was telling a falsehood when he
said that all payments passed through
his department of the New York LifeInsurance Company. But the testimony
of John A. McCall in the New York
lagislative investigation shows that it of John A. McCall in the New York legislative investigation shows that it he believed he was telling the truth he was ignorant of the essential facts. There was square deliberate lying in this case. It is not necessary to say who was the individual that lied. The New York Life Insurance Company lied to the State of Texas. The New York Life Insurance Company is today under the same management as in 1896. What men do once they are likely to do again. Until there is an entire change in the management of the New York Life Insurance Company not the alightest credence can safely be attached to any statement which it may make.—[Hartford Times.

a number of Southern California towns wrestled for first honors in the establishment of the State Pathological Laboratory and Experiment Station.

The commissioners present were Cov. Pardee, Dr. Benjamin Ide Wheeler, president of the University of C. lifornia, and Prof. E. J. Wickson, of the chair of agricultural practice in the university. Before them were ranged representatives of Pomona, Riverside, Whittier, Anaheim and Highland.

There was much discussion of pros and cons in an agricultural w.y. but after sitting until well in the evening the manner of choice between the towns was left duite undecided. Gov. Pardee believes that it is not for this commission to pick the place, but for the agricultural experts who may be appointed.

he said.

"The man," came the unanimous enswer.
And from the Pardee reply it is inferred that the man will soon be appointed, and that some Southern Californian stands a fine chance for this governmental position.

In the declaration of George A. Gates, president of Pomona College, Pomona has offered a free library, free laboratory, free museum and free assistance to the proposed laboratory, it it shall be established there. J. B. Neft has offered a free site at Anaheim, and also an acre or so of additional territory. J. H. Oszun of Whittier pledges his town to put up a building and maintain it.

The representation yesterday was as follows: Whittier: C. C. Buffington, S. W. Barton, L. Scoffeld, O. B. Griffin, J. H. Montgomery, C. W. Harvey, A. H. Dunlop, T. L. Gooch, Nicholas T. Edwards, W. The Commission, including Governor Pardee, will go to Whittier by electric

to be equipped with material and appli-ances necessary for a thorough study of orchard and vegetable diseases, and also for examination into conditions of soil and its cultivation.

It is expressly provided by the act that the station may be located on lands already belonging to the State at Whittler or Patton, or on lands given or leased.

The appropriation for the purposes of this act for two years is \$20,000.

NEW FOREST SUPERVISOR.

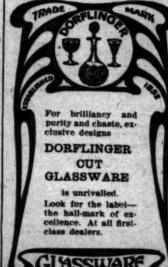

ering Two Reserves.

Rushton H. Chariton, forest inspector, has just been appointed Supervisor of the San Gabriel and San Bernardino Forest Reserve. His present offices are in the Byrne building.

Mr. Chariton, who though still a young man, has been for a number of years in government service, had his original home in Chicago, and has been in Los Angeles for several months. He succeeds to the place made vacant when Everett B. Thomas went out, a position which has been officially vicant since last June.

Mr. Chariton has been acting Supervisor some months. He said yosterday that he finds things in fine condition, with pleasant prospects of fevorable continuance, much to the contrary of the troublesome times experienced farther north.

A. R. Swarthout, a ranger, has just resigned. With this exception the forest force continues as it has been.

Dress the Boys Like Boys

THE right clothing makes the boy happy. The wrong clothing makes him unhappy. Boys want to be dressed mannishlylike their companions. They dislike to be ridiculed.

Dress them according to their age and size. Women understand more fully than men the importance of well-selected and stylish clothing. With them it is an instinct; with men it is a matter of education. If you agree with this statement you will see the necessity of teaching your boys in early life the serious importance of dress, so that in later years they will be able to exercise judgment and taste in its selection.

TROLLEY.

AY, OCTOBER 13, 1905.

SAN DIEGO BRIEFS.
Billy Woods of Los Angeles has signed to meet Dave Barry before the National Club of this city on October 25, in a twenty-round contest. Wools will soon come south to finish his training. The men are to fight at catchweights, but both will weigh about 185.

day and Thursday of next week.

Mrs. Soledad del Valle P. de Penginure of the City of Mexico, has arrived in company with an attorney especially commissioned by President Diaz, to make an attempt to secure guardianship papers giving her the right to take her nine-year-old niece, Maria Concepcion Pedrago, back to Mexico. The girl is an orphan, her father having been an officer in the Mexican army, who was killed in a battle with briganda, leaving her with her mother, who moved here, and died. The little girl has been living with her step-aunt and uncle, who refuse to give her up.

stor of The Times:) The article in your Sunday issue, headed "Lofty Site for Library," naturally interested me. Your proponents certainly struck the right lead when they proposed "Olive Heights" as the best central site for a public library building. So far, so good. It is an old and trite saying, that "the most sensible people in the world are they whose opinions agree with our own," and in their desire to get as near as possible to Angels' Flight, your proponents have my hearty approval, but when they propose to take the four very valuable corners at Third and Olive streets; to build over and blackade those now busy thoroughfares, and at the same time obliterate the "Angels' Flight," they go beyond my measure. My thirty-year franchise on Third street, between Hill and Olive streets, and which has twenty-six vears yet to run, would seem to be an effectual barrier to such an undertaking. The city could not, if it would, and I am quite sure would not if it could, annul my rights therein. So I have no apprehensions on that score, but I do not see how the plan as outlined could be carried out and the Angels' Flight be allowed to remain intact. Quite likely. I may not understand the plan in all of its details.

However, as I said in the beginning,

main intact. Quite likely: I may not understand the plan in all of its details.

However, as I said in the beginning, Olive Heights is undoubtedly the ideal place for the public library, and herein let me suggest a practical- location therefor, to wit: The Crocker and Newton properties, on the south side of Third street running through from Olive street to Clay street and having a frontage of 240 feet on both Olive and Clay and 185 feet on Third street.

From my familiarity with the value of property in that vicinity, I should say that this magnificent site could be obtained for \$100,000; by negotiation probably; but by consermation, if necessary. It is of sufficient area to give room for the building and in a large measure meet the desire of Librarian Lummis for parkage. By placing an elevator in the building at the corner of Clay and Third streets, the library patrons would have but 185 feet to walk from the street railway on Hill street, up an incline of about 18 per cent., and if they should wish to avoid this short walk up so easy a grade, they could take the Angels' Flight to Olive street. Where else can such ample grounds, so centrally located and with such commanding views, be so cheaply obtained?

A man of large affairs in one of our prominent eastern cities by too close attention to business, too little exercise and too many club dinners, finally began to pay nature's tax, levied in the form of chronic stomach trouble; the failure of his digestion brought about a nervous irritability, making it impossible to apply himself to his daily business, and finally deranging the kidneys and heart. In his own words he says: "I consulted one physician after another and each one seemed to understand my case, but all the same they each failed to bring about the return of my former digestion, appetite and vigor. For two years I went from pillar to post, from one sanitarium to another. I gave up smoking. I quit coffee and even renounced my daily glass or two of beer without any marked improvement.

"Friends had often advised me to try a well known proprietary medicine, Stuart's Dyspepsia Tableta, and I had often perused the newspaper advertisements of the remedy but never took any stock in advertised medicines nor could believe a 50-cent patent medicine would touch my case.

The root of the matter is this, the digestive elements contained in Stuart's Dyspepsia Tablets will digest the food, give the overworked stomach a chance to recuperate and the nerves and whole system to receive the nourishment which can only come from food. Stimushata and nerve tonics never give real strength, they give fictitious strength, invariably followed by reaction. Fitzhugh Lee Forgot One Smith. The late Gen. Fitzhugh Lee used

The late Gen. Fitahugh Lee used to tell with great gusto an experience he had during his gubernatoria i campaign in Virginia against J. S. Wise.

"Mr. Wise made the statement," sald the general, "that if I had been named Snith instead of Lee, I would never have been heard of. I endeavored to combat that theory, and in every speech I made during the campaign would touch upon Mr. Wise's statement and would then briefly refer to some famous historical figures, in order to show that the name Smith was not to be despised.

"One day I spoke before a large crowd on the courthouse green in a rural community, and i noticed a drunken man standing right up in the front row of listeners. I took up the Smith matter and informed those agriculturists what a distinguished family the Smiths had been. As I warmed up to the subject I noticed that something seemed to be worrying that drunken man, and more than once he seemed to be on the verge of interrupting me.

"I reminded my audience that a distinguished governor of the State had borne the name of Smith, and that many other men famous in war and in peace had borne the despised cognomen. Meanwhile the drunken man watched me with ill-concealed anxiety. Finally, he could stand it no longer. Lifting his hand and balancing himself with inebriated gravity he blurted out, 'Shay, gen'ral, don't forgit thash old Smith killed Pocahontan" "—[Lippincott's,

to the condition described by Mr. William Browne, of No. 1019 Lincoln street, St. Joseph, Mo. Mr. Browne is an expert tinner in the employ of the National Biscuit Co. He gives the following account of a trying experience:

"In the spring of 1902," he says, "while I was regularly working at my trade, I grew somewhat careless in my habits of eating and drinking, and finally found that my appetite was fickle, a bad taste lingered in my mouth, my nerves twitched and were beyond my countrol, my kidneys were out of order and cold sweats would break out over my body at odd times. Perhaps, while I stood talking with some one, this trembling of the limbs, and profuse sweating, and a severe chill would seize me. I became alarmed at my condition and, having read an endorsement of Dr. Williams' Pink Pills, I got a box and began to use them. They helped me at once. After I had used one box the twitching of the nerves, the trouble with the stomach and the cold sweats stopped and have not reappeared, and my appetite is good. Early in the morning under the direction of Vice-president Ross Clark himself, a parior car of the San Pedro road was placed at the disposal of the visitors and they were taken to all of the beach resorts touched by the line, spending nearly the entire day in a most enjoyable jaunt de luxe up and down the coast.

Th old timers early gave up all attempts to locate any landmarks, of half a century ago. The growth of the city has been a thing of such magnitude as simply to stagger them. They refused to see in it any connection with the Los Angeles of their recollection.

A number of old time friends and acquaintances, and representatives of later generations were on hand to act as guides for the "old boys" to pilot them safely across the wastes of asphalt, and about the mountains of stone and masonry from one "water hole" to another. So well did they do their work that not one of the visitors suffered from thirst at any time during the day.

This morning the party will be taken on a trip through the orange groves and to other points of interest about Los Angeles, returning in time for lunch.

Woman's Kidney Troubles

Lydia E. Pinkham's Vegetable Compound is Especially Successful in Curing This Fatal

Of all the diseases known, with which women are afflicted, kidney disease is the most fatal. In fact, unless early and correct treatment is applied, the weary patient seldem survives.

Being fully aware of this, Mrs. Pinkhams arely in her career, gave exhaustive study to, the subject, and in producing her great remedy for woman's ills.—Lydia E. Pinkham's Vegetable Compound—was careful to see that it contained the correct combination of herbs which was sure to control that fatal disease, woman's kidney troubles. The Vegetable Compound acts in harmony with the laws that govern the entire female aystem, and while there are many so called remedies for kidney troubles. Lydis E. Pinkham's Vegetable Compound as the only one capetable Compound is the only one capetable Compound is the only one capetable Compound is the only one capetable prepared for women, and thousands have been cured of serious kidney derangements by it. Derangements of the feminine organs quickly affect the kidneys, and when a woman has such symptoms as pain or weight in the loins, backache, bearing down pains, urine too frequent, scentry or high coired, producing scalding or burning, or deposits like brick dust in it; unnatual thirst, swelling of hands and feet, swelling under the eyes or sharp pains in the back running down the inside of her groin, she may be sure her kidneys are affected and should lose no time in combating the disease with Lydis E. Pinkham's Vegetable Compound, the woman's lib.

Lee and Burdetts.

The monthly dinner of the University Club kast evening was the occasion of a spirited passage-at-arms between Rev. Baker P. Lee and Rev. Robert J. Burdette. Dr. Lee had been appointed to speak on the subject of "Robert E. Lee," the great Confederate general, and he very warmly suiogised him from the viewpoint of a southerner. When it came Burdette's turn he declared that Lee was a traitor to his country, and took off most of the rose that Lee had bestowed upon Lee. The debate was much enjoyed.

South Park Rails Removed and Wires Cut.

Company Does Not Interfere, Will Carry Case on.

Spectacular Stunt Following Court's Decision.

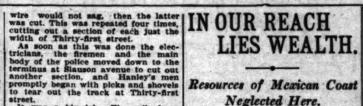

The injunction secured against the city by the Los Angeles Railway Company more than a year ago, to restrain the municipality from tearing up the rails laid on San Pedro sreet south of Thirtieth, and then by way of South Park avenue, which enter! San Pedro street at a sharp angle at Thirty-fourth street, to Slauson avenue, was dissolved by final decree of Judge York yesterday forenoon.

solved by final decree of Judge York yesterday forenoon.

Herbert Goudge, deputy City Aftorney, had the matter in charge and at 10 o'clock went to Judge York's Court to secure his signature to the decree. Walter Trask, who represented the railway company, still argued for delay and asked that he be given only two days, but Goudge would not yield, and the decree was signed.

It should be stated that a franchise over this route had been given to the Los Angeles Railway Company in 1897, stipulating that the round must be completed in two years, but it was not until 1804 that the railroad was built, against the protect of the city authorities.

antil 1998 that the railroad was built, against the protect of the city authorities. Street Superintendent Werdin announced his intention at that time of tearing it up, but was restrained by an order of court and it was this order that was finally set aside yesterday. In less than an hour after the decree was signed the residents in the vicinity

Resources of Mexican Coast to tear out the track at Thirty-first street.

It was a big job. The rails have been welded until they are continuous the length of the street, and great difficulty was encountered in sledging off the weld. One rail was removed from each track, so as to completely sever the conection at the point where the franchise ceases.

Chief Engineer Kurts of the railway company appeared on the scene and watched operations for awhile without approaching any of the city officials, and several railway, employés mingled with the crowd to see and hear, though not the slightest opposition was made to the tearing up of the tracks or the cutting of the wires.

WHY ESPEE GOT IN

WHY was the franchise for a spur track on Jackson street granted to the Southern Pacific instead of the Santa Fé?

Councilman George A. Smith of the Fifth Ward yesterday answered this pointed question and threw much light on the City Council's action, over which there has been lively controversy in the Eighth ward. Mr. Smith spoke for the other Councilmen who voted with him in favor of the Southern Pacific. He expressed his desire to explain clearly and fully for the City Council why, in the face of opposition from Jackson-street residents, right of way on Jackson street from Alameda street to the Los Angeles River was given to the Southern Pacific.

The district in question is a part of the Eighth Ward abown on the map herewith, comprising about one hundred acres, and having Aliso street on the south, Alameda street on the south. Alameda street on the south. Alameda street on the vertical city.

of Thirtieth and San Pedro streets were startled by a sudden influx of visitors whose personnel indicated that there was something unusual "doing."

Mayor McAleer and Deputy City Attorney Goudge, in an automobile, were the advance guard; City Electrician Manahan was at the head of a squad of men from his department, with a wogan load of apparatus; Chief Lips of the Fire Department went in his wagon in personal charge of a ladder-truck; Street Superintendent Hanley, in his auto, preceded a gang of city jaborers armed with picks, shovels and crowbars. Acting Chief of Police Auble in person headed a detail of police.

Everything was so quietly and quickly done that downtown only the officials and reporters knew what was going on, and the ladders were up and the first trolley wire was cut before anything of a crowd had gathered.

The first car stopped was No. 228, going south. It was met at Thirtieth street, just north of the Southern Pacific tracks, by the Mayor, Chief Auble and several policemen, and the conductor was told he could proceed no farther. The first notice the Los Angeles Railway officials had that anything was "doing" was when Conductor Seeborn ran across the street to a telephone and notified them of what had happened. There is a switch at that point, which was provided when that was the terminus of the road, and the cars at once began to make the regular runs from there.

here, unt you bin all a lot uf scoundrels. What fer you dink people vants to lif here if dere is no cars to ride?"

Down at Slauson avenue a gap was cut in the irolley north of the carbarn and a gang of men set to work to tear out a section of track at the same place. It was at first thought that this would be sufficient, but the Mayor and Goudge were not satisfied, so they reconsoltered the ground and decided to cut out another section, farther south and just safely within the city limits. There another crew of men began to tear up the rails.

The last-mentioned gap was not necessary so far as the South Park-avenue line is concerned to prevent cars getting to the barn, but it prevents runing cars around on Central avenue and reaching the barn from that direction. Access to the barn, however, is unimpeded by way of Maple avenue and South Main street.

The emergency tower of the railway company appeared on the scene while the work of destruction was going on, and acted as if it was the linention of the crew to at once begin repairs, but after the boss looked around for a minute he told them to go on to the car barns, and there they remained all ready for action, but did not attempt anything.

JUDGE WILBUR DECIDES AGAINST DAVIDSON'S CLAIM.

Defendant Enjoined from Interfer-ing With or Tearing up Tenth Street Under Franchise Which the City Council Voted Him—Racy Sur-prises Sprung in Bertelson Case.

In the suit by the city against A. N. Davidson, to enjoin the defendant from tearing up Tenth street for the purpose of laying a street railway, Judge Wilbur yesterday handed down ar opinion in which he gives judgment for the city, and enjoins the defendant from further interference with Tenth street.

Bids were received by the City Council for a franchise to construct a railway along Tenth street, the franchise was awarded to Davidson as the highest bidder and an ordinance was passed granting such franchise to Davidson. He paid the amount of the bid, \$7000, and executed the bond required by law, but the ordinance was vetoed and was not passed over the veto.

The question involved, and which Judge Wilbur examines at great length, inasmuch as the point is one that is fundamental in the city government, is whether the Mayor participates in the granting of these franchises. In the stipulation filed it appeared that the Mayor did not participate in the action of the Council in determining to grant the franchise, nor has he participated in the final ordinance granting the franchise.

"If the granting of a franchise is a legislative act, and there seems no serious question upon the point," says Judge Wilbur, "and if the Mayor, by the charter and by the power conferred upon the city with reference to franchises, is required to participate in that legislative act, it seems to me that the serious question is when should the Mayor participate. It will not do assume that he shall not assume that he assume that he sall not assume that he assume that he shall not assume that he assume that he shall not assume that he assu

Up to the last inning, San Francisco had been blanked largely through the good pitching of Jones. In the last of the minth, Jones lost control and in succession sent three men to first on balls. STANFORD UNIVERSITY, Oct. 11.—There has been great excitement at Stanford University for the past 7w days, born of an interest that has been steadily growing since the opening of the college. On the 14th of this month that excitement will reach its highest pitch in the freshman game between Berkeley and Stanford. What the result will be is hard to say as no one seems to be able to judge, the comparative strength of the teams being so nearly similar. While Berkeley is commonly admitted to have a stronger back field Stanford is thought to be better equipped in linemen and tackles. The game will probably hitch on some slip of fate turning the victory to one or the other of the com-

HOT FOOTBALL TODAY.

FIGHTING STUDENTS TO PLAY. PIGHTING STUDENTS TO PLAY.
Angered because their effigy was burned and danced upon before their eyes, the Sophomores of the University of Southern California donned their war togs yesterday afternoon and assailed the Freshmen. After twenty mirates of fierce scrimmaging the Sophs were downed and ducked in the refreshing coolness of the fishpond. So close was the struggle, however, between the rival classes that many of the Freshmen were also given their

antics of the lower classmen they swarmed on the roof, where, struggiling fiercely, they were rescued from a perlious predicament by President Bovard, who severely rebuked the offenders.

The Freshmen, not to be outwitted by the Sophomores, yesterday noon erected a saudy effigy of their rivals, set it abiase and danced the serpentine, enraging the upper classmen.

This afternoon will come the climax of the intense rivalry, when the annual Freshmen-Sophomore football game will be played. It is expected to be warm. The teams will line up as follows:

will certainly give Jeffries all he wants to do.

Herrera and Hanlon, who are matched here for the first week in November, will probably reach town this week to begin training and will go into the opposing camps now in action. The defi of Jack Johnson to go into a real dark room with Jeffries and let the first one who comes out be declared the winner, should contribute largely to the Joyfulness of the summer hours. While he is a good fighter he would probably be on the shortend of a 4 to 1 bet on the winner. Johnson is probably making his talk because he knows that Jeffries has retired from the game and wouldn't fight him if he was still in it.

Who will represent Stanford in the coming struggle is not yet known, although to a close observer it can be easily determined who the young champions will be. There has been an unusually large number of men trying out for the team this year, and Coach Langaa, in order to give every man a fair show, will not publish the names until the morning of the game. by the second of socialists which is scheming by many dark and devious tags to overthrow all semblance of suchority and government within this plendid and well-beloved municipality. The gang is well known and should be tragged from cover and dealt with irrily and summarily.

Grove Johnson's sophistries went for naught.

Bunkers, already sentenced; Emmons, now convicted; Wright and French, yet to go through the ordeal at the hands of the State,—these four men have fallen into the pit full of stakes which lies concealed along the "primrose way" of jocund politics that lightly considers the functions of civic representation. No honest man gives occasion to have such charges lodged against him; barnacles can't stick to a clean hull.

It is clear that the black folks are doing pretty well as replenishers of the earth.

Certain it is that there is not the slightest danger of the negro becoming extinct. And it is equally certain that, as he the better learns to take care of himself, avoiding the danger of the more healthful life of the country places, which the negro leaders are now advising their people to do, the race will increase more rapidly than ever before

Extinguishing A RACE.

A writer in a dinky Boston publication, called the National Magazine, that the nagro "problem" will soon cease to be a problem altogether, for the alleged reason that the negro is rapidly disappearing from the face of the earth and will soon become extinct as a species. The writer of the article in question is one John P. Heap, and what he doesn't know about the negro, the facts of history and the United States census is also a heap. He winds up his wonderful misconclusions in general, by this statement:

by socking to the cities or the rural districts and small towns, through the working together of the influences all luded to in this article, the birth rate will decrease and the death rate increase, so that there will come a time foreign experiments, which have never been proved to be practical?

Who could have any confidence in the rate will exceed the former and the race will rapidly decrease, the race problem cease to be a problem, and then will come extinction. This will as certainly occur as it has occurred to the North American Indian and the natives of the Sandwich Islands, the negro not being able to stand civilization.

The jurymen at Sacramento before whom he has been on trial these many days, once left to themselves with the testimony, made short shift of his case. "Guilty, as charged," was the verdict; and this brevity, we may be sure, is tribute to the merits of the prosecution's case. they numbered 57,488,788. Ten years later, in 1900, when the last census was taken, they numbered 8,840,789, an increase in one decade of 1,352,001 or 18.1 per cent. During the same dec-

Yet there is nobody in this municipality, so far as The Times is aware, who desires such a calamity to fail upon the misguided father of the "recall" iniquity. What sort of a Board of Council-

eranks could successfully knock away its foundations piecemeal? What substantial, trustworthy man would be willing to accept the office of Coun-cilman? It is difficult, under present conditions, to induce solid business become more difficult still to secure good Councilmanic material. The "recall" knocker is more likely to select the best men in the Council for his attacks than to select the worst men. No man of character and selfrespect will accept the office of Councilman if he is to be at the mercy of sees fit to vote contrary to the wishes of this small coterie of agitators, who assume to dictate the management of city affairs. The inevitable result of the complete triumph of the "recall" scheme would be the steady degeneracy of the Council, until it would become a body composed chiefly of men of the Howton stripe; men unfit to legislate for the city; men who would take their orders and their ideas from

If this "recall" idiocy be not stopped, the municipality of Los Angeles will suffer serious injury. Our credit will be impaired, our progress will be checked, our enterprises will be peralyzed, and we shall become the laughing-stock of the country.

The people have it in their power to checkmate the "recall" injusty until it can be eliminated from the charter. "They worship smallpox in Western Hindustan," said the missionary.

"But don't misunderstand me. Don't get a wrong impression," he resumed. "I don't mean to say that they love smallpox and desire it. On the contrary, they toathe and fear it. Hence their worship, a worship born of hate and terror.

"They have a goddess of smallpox.

She has a cruel face, two mouths, four red hands. They pray to her regularly, they flowers are always lying at her feet. A special priest tends her shrine.

LIRE LICKS UP MEXICAN HOMES.

IFTY FAMILIES LOSE THEIR HOMES AT BARSTOW.

The fire started just after midnight, and, fanned by a high north wind, had licked up fully minc shacks before the occupants of the others were aware of their danger.

The fire originated in a shack whose occupants had aincided a fire in the center of the building to heat the place abiase and the room filled with suffocating smoke. Breaking from the building, their screams alarmed the railroad crews, who, with the aid of shrill locomotive whistless soon had the white population of Barstow at the scene of the fire.

The Mexicans were too dazed to endeavor to save property or life, and it fell to the white settlers to rush from one shack to another arousing the lumates, while the round-house crew quickly brought a stream of water into play. But for the quickness of the citizens an awaking the Mexicans wany would plobably have suffered death.

The London "Times" is Not Satisfied

With the Work of the American

Correspondent.

[Newspaperdom, Oct. 5:] It is understood that George W. Smalley, the American correspondent of the London Times, is to be replaced by Dr. George Ernest Morrison, the famous correspondent of the Times at Peking.

Dissatisfaction has existed in the Times office over the handling of the peace negotiations at Portsmouth by Mr. Smalley. Dr. Morrison was assisting Mr. Smalley. Dr. Morrison was assisting Mr. Smalley. And while he furnished him with whatever information he gathered, Mr. Smalley wrote and signed all the dispatches. Dr. Morrison is said to have known twenty-four hours in advance of the intention of the Japanese government to waive all claim for an indemnity, which virtually meant the acceptance of the Russian conditions. He is said to have received this information by private cable from one of his mysterious sources of information. He notified Mr. Smalley of this, but as he declined to reveal the source of his information Mr. Smalley declined to send it to the Times.

As a result the Times was signally "besten," not only by the Associated Press, but by practically all newspapers in Europe.

Another cause for complaint, it is said, against Mr. Smalley is that, despite the protests of Dr. Morrison, he assumed a pro-Russian attitude, contrary to the policy of the Times.

The rumor that Mr. Smalley is to be retired in favor of Dr. Morrison has created much comment and talk, not only among newspaper workers here, but among diplomatists as well, to whom both are well known.

SPRING TOWN NOTES.

The difference between wool and cotton is very great; and in the case of separate threads of each is plainly apparent; yet, when these same threads are closely interwoven some good judges are mistaken and buy mixed cotton and wool goods, firmly convinced that there is not a thread of cotton in the cloth. It is the custom of all mills that manufacture cotton and wool interwoven when the cotton crosswise in the looms, thus leaving the wool to run lengthwise. This is done for two purposes; first, to impart the glossy appearance which the longer stretch of wool thread gives when run in the length of the goods, and secondly, because the proportion of cotton is necessarily less and therefore more difficult to distinguish in closely-woven fabric. There is one infallible test, however:

GREAT SUGAR INDUSTRY.

'The sugar business is one of the biggest industries in the Territory. There are two large, well-equipped refineries at Tepic, owned by the Aguirres, a Spanish family that has about twenty millions invested in the country. The sugar is the very best. They have also two cotton factories and these is a third factory owned by Barron.

'The cotton that is raised in the Territory is all used at home, and such is the demand that last year the Aguirres purchased raw majerial in Louislana, Alabama and Mississippi to the amount of 225,000, Mexican money, and shipped it to Tepic by the Mexican Central Railroad and overland seventy-five miles from San Marcos. The manufactured goods are sent to many parts of Mexico. The factories have been established for about fifty years, and this doubtless keeps them located there, for sentimental reasons, perhaps, despite the big handleap imposed by lack GREAT SUGAR INDUSTRY.

"The demand for machinery, tools, etc., is large. Farming implements are needed, and the amount of mining machinery wanted is increased. We have hope of getting the Mexican Central Railroad extended from San Marcos, and the new line to be built by Harriman down the coast to Guadalajare and Mexico City will go through the Territory, and this will result in a great opening and development of the country in mining and agriculture. There are sliver, gold and many other minerals and metals found. I am interested in one free gold property, and there are a number of other mines operating in the region. The Owl Drug Co. Say They Do Not Charge Anything for Vinol Unless it Grees Satisfactory Results

When asked by a reporter how they could make such a broad offer in regard to any medicine, a member of the above firm replied:

"If Vinol were a patent or secret preparation it would be another thing, but it is not, everything it contains is named on the label.

"Vinol is simply the up-to-date form of administering cod liver oil, which for centuries has been recognized as the grandest of all body-building agents for wasted human strength and vitality, and during the last five years we have seen it produce such grand results that we are now willing to back it with any kind of a guarantee.

"In Vinol we have simply done away with the useless, system-clogging oil and have given to the people all the medicinal, body-building elements of cod liver oil in a highly concentrated and deliciously palatable form, and we have never sold in our store a medicine of more curative and strength-creating value than never sold in our store a medicine of more curative and strength-creating value than Vinol, and if the people of Los Angeles only realized its value we would not have clerks enough in our store to supply the demand for it. In a natural manner Vinol tones up the digestive organs, makes rich red blood and creates strength. We can only ask the people of Los Angeles to try it on our guarantee." The Treatment of Many Conditions is the Direct Cause of Chronic Troubles Has your trouble become chronic through improper treatment or neglect? Have you been treated by harsh treatment that irritates and seems to aggravate and make your trouble worse? In nine cases in ten this is true, and the unreasonable treatment of many conditions is the direct cause of chronic complications. There are some who are treated for conditions they do not have, which is partly due to GUESSING THROUGH THE MAIL and a hurried examination, not getting at the EXACT CAUSE. I get started right—that is the foundation for a cure. When I treat I know what for and why; and I am safe in saying that the cures are more frequent than by other means.

UNIQUE GUN FOR CASHIER.
Rev. E. J. Bulgin walked into the First National Bank with a gun over his shoulder and everyone "ducked." The evangelist's mission, however, was peaceful; the gun was a present to Cashier Charles L. Heartwell. It is a Bergaman carbine, and one of two guns of its kind in the country. President Roosevelt has the other. It can be discharged fifty times in four seconds, and has a barrel within a harrel. One pressure of the finger fires ten shots, and pressure of a button throws in another magazine. The weapon carries a mile and will penetrate forty inches of solid wood. The stock is hand-carved, the work of the evangelist.

The carbine was presented to Dr. Bulgin two years ago at Henry, Ill., by the Western Illinois Sociological Club, a league of fourteen cities.

HEAR INAUDIBLE SOUNDS. Twin Daughters Cause Much Cur ity Because of Peculiar Gift They Possess.

They Possess.

[St. Paul Pioneer Press:] Much wonder and curlosity among people in general and much interest among medical men are being aroused in this section of the country by the strange gift of hearing exhibited by Molille and Gertie, the eight-year-old twin daughters of Sigsmund O'Reilley of Tuppan township in this county.

These strange children are so pecularly gifted by nature that they are enabled to hear counds inaudible to ordinary ears. If a viblin bow be drawn across the strings slower and slower till it no longer produces a sound that an ordinary person can hear, it still, for a long time after no one else can hear it, causes the air to vibrate in waves that affect the auditory nerves of these two little girls. If the edges of two knives be olled and drawn across each other so lightly that no rasping or filing sound audible to others is made, the girls can plainly hear the sound and it often affects them as a shrill, rasping sound does other persons. It has been repeatedly proved that the girls are not pretending to possess this power when they actually do not, for on many occasions when they were not noticing what was being done, persons desiring to test their

ASSOCIATED OIL.

From a strong outlook Associated Oil has turned weak. The confident buying observed in the market for some time past has entirely disappeared. Belated buyers around high figures have become impatient for profits, which have not been realized, and while few have sold there is evidence of uneasiness. The concentrated support which was counted upon by small investors to create a steady advance has been withdrawn. Should this support not be immediately forthcoming it is my opinion that an extended break is inevitable.

A transition from extreme confidence to uncertainty, and from uncertainty to something bordering on fright is apparent, and speculators who are holding the stock on margins appear to be looking for a place to unload. The stock may sell at seventy-five, as has been freely predicted, but for these reasons is at present distinctly pointed the other way.

[Cleveland Plain Dealer:] If there remains any doubt that the men in Tokio who made peace with Russia know more of Japan's actual strength than those in that capital's streets and newspaper offices, that doubt should be dispelled by the heart to heart talk which the former Foreign Minister, Okuma, had yesterday with representatives of Japan's Associated Chambers of Commerce. It amounts virtually to an admission that at the time the peace conforence met in Portsmouth. tatives of Japan's Associated Chambers of Cormerce. It amounts virtually to an admission that at the time the peace conference met in Portsmouth. Japan, though with an unbroken record of victories in the field, was at the end of her financial rope. She was menaced, not by the Russian army in Manchuria, but by bankruptcy at home. Though the army and the irresponsible and ignorant Tokio mob clamored for more war, the Mikado and the "eider statesmen" who reached the decision that peace must be made knew that further war meant financial ruln; that it must be either immedints peace or not remote bankruptcy. Count Okuma told those Japanese business men that by the time the fitoops have been withirawn the country will face a national debt, the interest on which will be a sum equal to twice the entire revenue of the country a decade ago. Before the war the per capita rate of taxation was \$3. Now it is \$35.

All of which explains Japan's desire for a cash indemnity, and at the same time her refuctance to linist upon it to the point of breaking off negotiations and continuing a struggle which could only make her financial plight more desperate. Now that the cat is officially out of the bag there should be in Japan a su3den realisation of the mocessity for ratifying, the truty and a rapid subsidence of the popular resentment against that treaty's makers. Of course there was no illusion in the best informed Japanese circles as to the tremendous financial burden of the war and all the perils that it entailed, but this frank and public arows should reconcile to the inevitable the ignorant and thoughtiess who forget that military giory costs more than blood.

The confession, too, is likely, to cause some chagrin in Russia and to some extent justify those who held that Russia could win by reason of having a longer purse. It will tend to confirm the belief of the Russian Minister of Finance that victory could be won "right here at this deek." All this might have come to pass had the Russian army and navy been capable of making

Infants' and Children's Wear

If mothers would stop to think that it is a waste of time to make up infants' garments when the ready-to-put-on wearables can be purchased at such small price, they would make a special shopping trip to Hamburger's to take ad-vantage of the following offerings.

A large assortment of infants' and children's soiled wearables, consist-ing of infants' slips, children's ing of intants' sips, children's gowns, short skirts, fancy white aprons and small size gimps, that formerly sold at 50c to 75c.
